PROFESSIONAL EXPERIENCE

Sthorme Data

Dic 2025 – Present

Full Stack Engineer & Co-founder

AI-powered marketing intelligence platform for analyzing Instagram and Facebook metrics through natural language.

- Architected and owned the cloud infrastructure on AWS, defining deployment pipelines, environments, and scalability strategies from day one.
- Drove key technical decisions across the stack, balancing speed of delivery with long-term maintainability.
- Operated in a high-ownership, fast-iteration environment — shipping, measuring, and refining based on real user feedback
- Integrated frontend with Python (FastAPI) backend services, bridging AI-driven analytics into a seamless user experience.

Atrato Pago (YC 21)

Aug 2024 – March

2026

Full Stack Engineer

- Built and maintained REST APIs using Node.js and TypeScript, ensuring clean architecture and consistent performance
- Developed and maintained backend services integrated with MySQL databases, handling data modeling and query optimization.
- Wrote automated tests to ensure code quality and prevent regressions across critical flows.
- Delivered new features for both internal systems and external-facing products, collaborating closely with the team throughout the development cycle.

Vopper

Jan 2024 – Jul 2024

Full Stack Developer

- Built and iterated on core modules for an enterprise ERP with **React**, **Vue.js**, and **Nest/MySQL** serving **500+ users**; redesigned key UX flows reducing task completion time by **~30%**.
- Introduced **Vitest** testing, formalized PR review gates, and championed **clean code** under Scrum — eliminating critical production bugs across 2 consecutive release cycles. Migrated legacy jQuery to **React** with composable patterns, cutting bundle size by **~25%**.
- Designed and implemented business logic layer, translating product requirements into robust, maintainable backend solutions.

LinkTIC

April 2023 – Jan 2024

Full Stack Developer

- Collaborated closely with cross-functional teams to translate business requirements into technical implementations.
- Handled database design and optimization tasks, improving performance on data-heavy workflows.
- Participated in code reviews and technical discussions, raising the overall quality and standards of the codebase.

TecNM

Feb 2023 - Dec 2023

Volunteered Full Stack Developer

- Designed and delivered hands-on lessons covering fundamentals of programming logic, data structures, and problem solving.
- Mentored students individually, adapting explanations to different learning paces and styles.
- **React** SPA with role-based access, dynamic forms, and real-time validation.
- Contributed to building a stronger technical foundation within the academic community.

NOTABLE PROJECTS

Devshub Community — An active social network where developers share posts, join discussions, and organize hackathons and coding challenges.

RubyFlow — An active SaaS platform to manage clients via AI-powered WhatsApp and calls — schedule appointments, sync them to your calendar, and let AI handle incoming and outgoing calls automatically.

Hireflow — A recruitment platform that automates hiring by intelligently matching talent with companies, streamlining the selection process for faster, higher-quality hires.

Papermind — An active platform that lets you instantly chat with any PDF and collaborate on documents in real time with your team.

TECHNICAL SKILLS

Frontend: React, Next.js, Vue.js, Svelte, TypeScript, JavaScript, Tailwind, Styled Components, Framer Motion, shadcn/ui

Backend & Data: Node.js, Nest.js, Python (FastAPI), PostgreSQL, MySQL, Redis, Supabase, Docker, RabbitMQ, BullMQ

Architecture: REST APIs, MVC, Repository Pattern, SOLID Principles, Clean Code, Component-Driven Design, hexagonal architecture

Cloud: AWS, GCP

Tools: Git, GitHub Actions, Vercel, Vite, Vitest, Jest, Figma, Scrum/Agile, CI/CD

EDUCATION & LANGUAGES

Systems engineering — TECNM - Agua Prieta, Sonora

2021 – 2023

Spanish (Native) · **English** (Intermediate — B2)
